

## NGRAVE users can now seamlessly swap their crypto, powered by Changelly

18/04/2024 17:00 – CEST – Brussels

The NGRAVE ecosystem empowers users to seamlessly swap cryptocurrencies using the Changelly integration within their [NGRAVE LIQUID app](#). With the cold wallet NGRAVE ZERO, users can now effortlessly exchange a [large number of cryptocurrencies](#) without exposing private keys to online vulnerabilities. How it works: users specify the swap they want to make in the LIQUID app, which generates a QR code representing the transaction request. They scan this code offline with the hardware wallet ZERO, on which the user can then verify and sign the transaction, generating a transaction signature QR code. The user can then subsequently scan this code with the app to broadcast the transaction to the blockchain, for a final confirmation of the swap.

As [Ruben Merre](#), Co-founder and CEO of NGRAVE, stated, 'At NGRAVE, our priority has always been to offer our community the highest standard of security and ownership. I believe that security does not have to compromise on convenience or accessibility. With the partnership

and integration of a trusted party like Changelly, who have been working hard on this since 2015, we empower our users to maintain both security and liquidity seamlessly.”

In addition, the Changelly team stated, “Integrating swapping services into the NGRAVE ecosystem is a step further toward Changelly’s mission of enabling effortless crypto asset exchanges for all users, regardless of users’ preferred storage methods for cryptocurrencies. This partnership with NGRAVE aligns perfectly with Changelly’s overarching goal of advancing the mass adoption of cryptocurrencies and building towards a future where digital assets are widely embraced.”

To celebrate the start of this partnership, Changelly will offer 0% service fees on floating rate swap transactions. NGRAVE ZERO users will benefit from this advantage from the 17th of April till the 23rd of April. Changelly users will also have a chance to win an [NGRAVE COMBO pack](#), including the Coldest Wallet ZERO and GRAPHENE the Ultimate Encrypted Backup, to experience swapping with the coldest wallet. The giveaway will be available on Changelly’s [X](#) (Twitter).

### **About NGRAVE**

Founded in 2018, NGRAVE is a digital asset security provider offering user-friendly maximum security solutions for blockchain and crypto use cases. Its flagship product – crypto hardware wallet “NGRAVE ZERO” – is the world’s only financial product boasting the highest security certification: EAL7. NGRAVE is partnered with the world’s top tier in nano- and chip technology, cryptography and hardware security, and counts among its advisors several blockchain pioneers such as Jean-Jacques Quisquater, famous cryptography professor and second reference of the Bitcoin paper.
